Wagman Heavy Civil Awarded Contract for MD 24 Interchange

(York, PA) Wagman Heavy Civil, Inc. and Joint Venture Partner, Allan Myers, Inc., announce they have been issued the contract for the I-95 ETL Northbound Extension MD 24 Interchange project.

The \$199M project for the Maryland Transportation Authority (MDTA) includes the installation of two express toll lanes (ETL) and four general purpose lanes for I-95 Northbound and Southbound. This multi-phased project will include a full interchange reconstruction including the replacement of the existing MD 24 bridge, construction of a new southbound bridge on I-95 over Winters Run, maintenance of traffic, signage structures, toll gantry, stormwater management and stream restoration.

This is the fourth joint venture (JV) project for Wagman Heavy Civil and Allan Myers. The two companies are currently finishing work on the \$196M MD 152 Interchange project in Harford County, MD and beginning construction operations on the \$173M I-64 Gap C Design-Build project in Virginia. They also completed the award-winning MD 404 Dualization Design-Build project (along with David A. Bramble, Inc.) in 2017.

“We are excited to wrap up the MD 152 project as our teams move up I-95 to the next interchange,” states Greg Andricos, President & COO of Wagman Heavy Civil. “We look forward to once again working with our Allan Myers teammates in collaboration with the Maryland Transportation Authority to deliver these critical infrastructure enhancements for the state of Maryland.”

Wagman is a multi-faceted construction firm with major operations in heavy civil, general construction, and geotechnical construction services. Founded in 1902, Wagman is a fourth generation, family-owned company with offices in Pennsylvania and Virginia and is headquartered in York, PA. As a heavy civil contractor, Wagman is a nationally recognized leader within the industry. Wagman’s core competencies include: design-build, infrastructure, marine construction, modified concrete, grooving and grinding, and geotechnical construction services.
